Ya Li, Jianhua Tao, Linlin Chao,Wei Bao, Yazhu Liu, CHEAVD: a Chinese natural emotional audio-visual database, Journal of Ambient Intelligence and Humanized Computing, 8(6): 913-924.

4.

Yibin Zheng, Ya Li\*, Zhengqi Wen, Bin Liu and Jianhua Tao, Investigating Deep Neural Network Adaptation for Generating Exclamatory and Interrogative Speech in Mandarin, Journal of Signal Processing System, 2017, 90(7):1039-1052.

5.

Hao Che, Ya Li\*, Jianhua Tao, Zhengqi Wen, Investigating Effect of Rich Syntactic Features on Mandarin Prosodic Boundaries Prediction, Journal of Signal Processing Systems, 2016, 82(2):263-271.

13.Name of nominator

Dong Wang

14.Supporting Statement (not to exceed 600 words)

Prof. Ya Li is an active researcher in speech and language processing. She has published many high-quality papers in the field, including quite many on APSIPA. Prof. Li is also active in serving the research community -- she took the role of organizers of a couple of domestic and international conferences.

Prof. Li also served APSIPA as reviewers for many times. I highly recommend Prof. Li joining the SLA TC.
